## OVERVIEW

---

I am passionate about estuarine hydro-environmental problems and natural hazards and am motivated to contribute to the field of coastal engineering. My areas of expertise are mainly numerical modeling of hydrodynamics and waves and field works that can help to mitigate coastal vulnerability and environmental and economic loss.

**Research Interests:** Coastal Engineering, numerical modeling, marine renewable energy, estuarine hydrodynamics, wetlands, hurricane surge and waves, flood risk management, remote sensing & GIS.

## EDUCATION

---

<b>Ph.D. in Civil Engineering</b> <i>University of Delaware, Newark, DE 19716, USA</i> Advisor: Dr. James T. Kirby	2015-2020
<b>M.Sc in Civil and Infrastructure Engineering</b> <i>George Mason University, Fairfax, VA 22030, USA</i> Advisor: Dr. Celso Ferreira	2013-2015
<b>B.Sc in Civil and Environmental Engineering</b> <i>Shahjalal University of Science and Technology, Sylhet, Bangladesh</i>	2007-2011

## PROFESSIONAL EXPERIENCE

---

<b>Earth Scientist (S&amp;E II)</b> <i>Offshore Wind and Ocean Dynamics, CSD/MCRL, Pacific Northwest National Laboratory</i>	2022-Present
<b>Postdoctoral Research Associate</b> <i>Offshore Wind and Ocean Dynamics, CSD/MCRL, Pacific Northwest National Laboratory</i>	2020-2022

### Ongoing Projects:

- ☐ Integrated Coastal Modeling (ICoM): Developing an integrated terrestrial-coastal modeling system (DHSVM-FVCOM-RIFT)  
Team: Zhaoqing Yang, Mithun Deb, Taiping Wang, Ning Sun, Karthik Balaguru, Wenwei Xu, David Judi ([ICoM team website](#)), Sponsor: Office of Science, U.S. Department of Energy
- ☐ Tidal Energy Resource Refinement: Theoretical and numerical analysis  
Team: Zhaoqing Yang, Mithun Deb, Taiping Wang; Georgia Tech - Kevin Haas, Matthew Falcone, Sponsor: Water Power Technologies Office, U.S. Department of Energy

□ Tidal Turbulence Modeling: Regional scale RANS model development, validation and application for tidal energy resource assessment

Team: Zhaoqing Yang, Mithun Deb, Taiping Wang; NREL - Levi Kilcher, *Sponsor: Water Power Technologies Office, U.S. Department of Energy*

#### **Graduate Research Assistant**

2015-2020

*Center for Applied Coastal Research, University of Delaware*

□ Field and modeling studies of salt marshes for providing possible remedial steps to restore a healthier marsh environment in the Delaware Bay. Developed a comprehensive, 3D model system for a rapidly eroding salt marsh system, and measured data sets for the model verification.

□ Proposed and implemented a new set of 2D shallow water equations to improve the present-day limitations in numerical modeling of salt marsh flooding and draining.

□ Field works include extensive bathymetric surveying in channels, current velocity measurements using NORTEK ADCPs deployed in several major channels, HOBO tide gauges on marsh platform, and deployment of rapid-sampling RBR pressure gauges in tidal flats.

#### **Graduate Research Assistant**

2013-2015

*Mason Flood Hazards Research Lab, George Mason University*

□ Storm surge and wave modeling in the coastal regions of Bangladesh. Research findings have highlighted the importance of the coupled wave and hydrodynamic modeling to calculate storm surges in a region with poor observational coverage.

□ Storm surge modeling and hazard analysis in Chesapeake Bay, Virginia using ADCIRC coastal circulation model. Results demonstrated the efficacy of wetlands in storm surge attenuation and also supported planning of wetlands restoration projects that has multi-objective benefits for the society.

□ River planform channel dynamics and bank migration hazard assessment using historical Landsat imagery's of different periods and hydrologic data.

#### **Lecturer**

2012-2013

*Civil Engineering, Stamford University Bangladesh*

□ Instructed beginner level under-graduate courses on Environmental and Water Resources Engineering.

### **AWARDS & FELLOWSHIPS**

---

#### **Graduate Research Award, University of Delaware**

2020

*The Civil Engineering Graduate Research award recognizes excellence in research conducted by a graduate student enrolled in a Master's or PhD degree program in any discipline of Civil Engineering.*

#### **Professional Development Award, University of Delaware**

2019

*For participating in the 2020 Ocean Sciences Meeting*

#### **Professional Development Award, University of Delaware**

2018

*For participating in the 36TH International Conference on Coastal Engineering 2018*

#### **Microsoft Azure for Research**

2015

*"Gifting letter: Microsoft Research offers to make available one Microsoft Azure Platform 12-month account to George Mason University at no cost for research purposes. The estimated total market value of this offer is USD 20,000."*

## Distinguished Graduate Fellowship, George Mason University

2013

*“Mr. Mithun Deb was named as the first recipient of the Balfour Beatty Distinguished Graduate Fellowship, made possible through a gift from the international construction and infrastructure services company, Balfour Beatty.”*

## INVITED TALKS AND SEMINARS

---

1. Deb, M., Tidal hydrodynamics in a multi-inlet wetland system: toward improved modeling of salt marsh flooding and draining, NOAA Coastal Ocean Modeling Science Seminar, NOAA Coastal Marine Modeling Branch (NOAA/NOS/OCS/CSDL), Apr 11, 2023
2. Deb, M., Present-day limitations and challenges in numerical modeling of tidal hydrodynamics inside an eroding salt marsh system, Physical Sciences Seminar Series, Virginia Institute of Marine Science, College of William & Mary, VA, Feb 6, 2020
3. Deb, M., Numerical modeling of coastal, estuarine and urban hydrodynamic processes and associated hazards, Civil and Environmental Engineering seminar, Rowan University, Glassboro, NJ, Jan 30, 2020
4. Deb, M., Hydrodynamics in an eroding salt marsh environment: model validation and performance limitations, COFDL talk in Applied Ocean Physics & Engineering, The Woods Hole Oceanographic Institution, Woods Hole, MA, Nov 15, 2019

## PROFESSIONAL TRAINING

---

1. WAVES SUMMER SCHOOL 2019, Organized by NOAA Center for Weather and Climate Prediction, University of Maryland, College Park, MD, Jul 22-26, 2019
2. FUNWAVE-TVD Workshop 2018, Organized by CACR, University of Delaware and the US Army Engineer Research and Development Center, Newark, DE, Jul 25–27, 2018
3. 2015 ADCIRC User's Group Meeting and ADCIRC Boot Camp, NOAA Center for Weather and Climate Prediction, College Park, MD, Mar 30-31, 2015
4. 2014 WRF for Hurricanes Tutorial, NOAA Center for Weather and Climate Prediction, College Park, MD, Jan 14-16, 2014

## SYNERGISTIC ACTIVITIES

---

Reviewer of the following international scientific journals: *Natural Hazards and Earth System Sciences* (Copernicus), *Natural Hazards* (Springer), *Journal of Waterway, Port, Coastal, and Ocean Engineering* (ASCE), *Environmental Earth Sciences* (Springer), *Marine Geodesy* (Taylor & Francis), and *Marine Technology Society Journal (MTSJ)*

## COLLABORATORS

---

Zhaoqing Yang, Robert Hetland, Taiping Wang, Ning Sun, Karthik Balaguru, David Judi, Mark Wigmosta (PNNL); James J. Benedict (LANL); Michael F. Wehner (LBNL); James T. Kirby, Fengyan Shi (UDel); Celso Ferreira (GMU); Ali Abdolali (NOAA); Levi Kilcher, Aidan Bharath (NREL); Kevin A. Haas (Georgia Tech)

## MEMBERSHIP

---

- ☐ American Geophysical Union (AGU)
- ☐ American Society of Civil Engineers (A.S.C.E.)
- ☐ Coasts, Oceans, Ports, and Rivers Institute (COPRI-ASCE)

## SOFTWARE CAPABILITIES

---

- ☐ MATLAB, FORTRAN, PYTHON, ArcGIS, High Performance Computing (HPC)
- ☐ Finite Volume Community Ocean Model (FVCOM), ADCIRC, SWAN, DELFT3D, FUNWAVE-TVD, FEMA-WHAFIS, CShore

## LANGUAGE PROFICIENCY

---

- ☐ Bangla (native language); English; Hindi.
